Personal Essay

Some students have a background, identity, interest, or talent that is so meaningful they believe their application would be incomplete without it. If this sounds like you, then please share your story.

“Stay hungry, stay foolish” This Steve jobs quote is a huge motivator for me to pursue my dream consistently. I grew up in Ethiopia Addis Ababa, one of the developing countries which is found in the horn of Africa. I have experienced so many difficulties while I pursue my dream and education. In my early ages, I had shown a better understanding in art than compared to my friends, also my parents who invasion my interest sent me to a local art school, then I have finished up being in the top 20 in my class. After that I started doing amazing abstract artworks and got a chance to participate in many competitions. However after a few years, my interest in the art got lessened for many different reasons, mostly rooted through lack of resource and motivation, which is revealed by people's lack of concern for the profession.

Unexpectedly, my interest in art shifted to something that I didn't expect. As a kid, I used to play with clay to build cars, houses and other creative things as a normal Ethiopian kid, this passion of creating and innovating things with clay became a springboard for me to develop my career in creative works like computer assisted innovations and computer programing. This was the time that I realized that I can do more amazing creative works. I finally understood what I want to pursue in the future. In the last years of middle school I got invited to participate in various competitions in my school and across the country. I won every competition starting from my school to district level and up to the sub-city. The creative work that I did to compute was an elevator and a train wreck, which is a good experience to learn about electric works deeper. But my work won't be able to continue up to the sub-city level and beyond due to scarce resources. And I was the one who is the founder of my school's creativity club.

Sitting and doing these creative works make an impact on my physical health, so in grade 9 I took training in basketball for 2 years. Beside all this, seeing people dying with cancer touched my feelings, so I volunteered for “Matthias Wondu Ethiopian Cancer Society” as a fundraiser for a few years. I have organized a lot of events in order to raise money. Participating in this kind of voluntary work has helped me to have a good communication skill.

I always watch new things about technology to inspire myself and create something that supports my community and country. I always desire to learn new things each day. But, there are still so many obstacles while I try to pursue my higher education in Ethiopia. The political instability and the racial crisis is making a huge impact on my future dream. Specifically, racism in Universities has made hundreds of students lose their precious life. But I believe there is a solution for everything that is why I am applying to one of my favorite Universities (UNIVERSITY NAME) I will try my best until I get the best educational system to achieve my dreams. As Steve j. says “Stay hungry stay foolish

Education Progression

Education progression details

Did or will take gap year

Required Explanation

Education progression

Because the school has been a boarding school since grade 10

Secondary school change

12th grade because I went to university

Missouri University of Science and Technology Questions

General

Preferred start term Fall 2022 (August-December)

Preferred Admission Plan Rolling Admission

Did you attend a summer camp? No

Testing Plan No

Academics

Area of Study Computer Science

Activities

What activities at Missouri University of Science and Technology interest you? List in order of preference Computer/Technology

Contacts

Have you previously applied to Missouri University of Science and Technology? No

How have you learned about Missouri University of Science and Technology? List in order of influence Website

I give permission to Missouri University of Science and Technology to send me updates via text messaging. (Standard message charges apply.)

I consent to be contacted by Missouri University of Science and Technology at the mobile phone number provided below.

Phone Number +251.73094712

Family

Did you have a parent and/or a grandparent who graduated at any time from MSM/UMR/S&T?

No

Have either of your parents/guardians completed a Bachelor's degree?

Yes

Parent Contact Information

yohannesmengistu34@gmail.com

Residency

Do you believe you may qualify for in-state tuition?

Yes

Are you a resident of Missouri?

No

Additional information

Have you ever been suspended, dismissed, expelled or subject to any disciplinary action for any reason (including academic dishonesty), at a college, university or other post-secondary educational institution?

No

Affirmations

By submitting this application, I affirm my understanding of and agreement to the statements found here:
